Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is response to a restriction requirement filed March 15, 2005. Claims 1-10, drawn to a baffled fuel tank were elected without traverse. Method claims 11-15 have been withdrawn. An action on the merits of claims 1-10 is included in this Office action.

Claim Rejections - 35 USC § 102

2. Claims 1-4, 6-8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by May et al (Figure 3) . In particular note the support “resin” support members disclosed as made by molding for to vertically support the tank partitions (baffles 38) of tank 34. A slot 44 in the tank helps to keep the partitions (support member) “...from slipping off said inner surface of said tank wall.”. The support members (baffles) are made and resin and are thereby elastic (claim 10).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 3753

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 148 USPQ 459, that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or unobviousness.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over May et al in view of Shibao. May et al disclose the claimed invention except for the recitation of the tank including a "tube" to allow wiring to extend outside the tank as taught by "pump" 7 and ports in the upper tank housing of Shibao. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the tank of May et al to have such a port for wiring as taught by Shibao in order to provide outside the tank wiring for pumps, etc of May et al.

Allowable Subject Matter

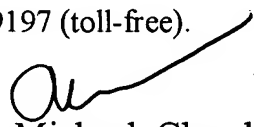

7. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
